

Agile radio system

C R O P M A N A G E M E N T

SQUARE ONE
LABORATORIES

Combined control and data collection

System features

- Low power consumption – battery operated
- Long distance
- Multi level Store and forward ability
- More than 2000 valves on a single network
- Control & data collection in one system
- Interfaces with any controller
- Centralised Windows setup, monitoring & configuration
- Build-in radio channel quality survey tools

Control RTU features

- Modular construction with 4 expansion slots
- Controls 1 to 9 valves
- Monitors 2 to 10 water meters
- Sealed case with four cable glands
- Auto valve shut down on loss of communication or low battery
- PC based configuration

Data RTU features

- Modular construction with 4 expansion slots
- Direct sensor interface and provision of power
- Wide variety of expansion cards
- Optional large log with date and time stamping
- PC based configuration
